I am a senior full-stack developer with over 9 years of experience in software development across various industries, with the 5 most recent years focused on React and TypeScript. I love working with great people, inspiring others, and being inspired. I have successfully worked with numerous clients to define requirements, design new system elements, implement new functionalities, and optimize existing systems. I also worked in executive and leadership positions for different small and medium startups. I'm meticulous with implementation details while always considering and balancing broader stakeholder concerns.
